

# Snow-Tubing System

## Engage and release system

Just made for fun in the snow for young and old. This simple idea allows for installations of different sizes. The rugged materials guarantee a long and satisfying service life. The **patented towing handle with the engage and release system** from Borer Lift AG is suitable for snow-tubing with all Borer ski lifts as well

as ski tows from other manufacturers. For further information please contact the address below.

### The snow-tubing package:

- **Tube**, external diameter 70 cm and 100 cm with inflatable inner tube, wear resistant fabric covering, rigid

base, tear-proof pulling cord, 2 handles, available in different colours.

- **Towing handles**
- **Automatic engage station**
- **Automatic release station** with monitoring switch
- **Rope connection coupling**
- **Ski lift systems** as required

**Advice, planning and execution of ski lifts and children's theme park installations.**
